

Frequency Of Pure Essential Oils

The **effectiveness** of Pure Essential Oils cannot be fully understood without some understanding of **Frequency**.

Frequency is the measurable rate of electrical energy flow that is constant between any two points. Everything has frequency. Dr. Robert Becker in his book **“The Body Electric”** establishes that the human body has an electrical frequency and that much about a person’s health can be determined by it.

In 1992, Bruce Taino of Taino Technology, an independent division of Eastern State University in Cheney, Washington, built the first frequency monitor in the world. Taino has determined that the average frequency of a healthy human body during the daytime is 62 to 68 MHz. When the frequency drops, the immune system is compromised. If the frequency drops to 58 MHz, cold and flu symptoms appear; at 55 MHz diseases like Candida take hold; at 52 MHz, Epstein Bar and at 42 MHz, Cancer. Taino’s machine was certified as 100 percent accurate and is currently being used in the agricultural field today.

According to Dr. Royal R. Rife, every disease has a frequency. He has found that certain frequencies can prevent the development of disease and that others would destroy diseases. Substances of higher frequency will destroy diseases of lower frequency.

The study of frequencies raises an important question, concerning the frequencies of substances we eat, breathe and absorb. Many pollutants lower healthy frequency. Processed or canned food has a frequency of zero. Fresh produce has up to 15 MHz; dry herbs from 12 – 22 MHz; and fresh herbs from 20 – 27 MHz. Processed, canned foods have no measurable frequency. **It would seem we need a source of higher frequencies to maintain our good health.**

Essential oil frequencies “start at 52 MHz” and go as “high” as 320 MHz.

Pure Essential oils provide a positive frequency to the body and they **“contain oxygenating molecules”** which **“transport nutrients into the cells”**. The interior lipids of cells are in harmony with essential oils. Oils can align frequencies, thus **balancing** and **harmonizing body organs**. Mixing or blending oils amplifies these frequencies. Clinical research shows that essential oils have the highest frequency of any natural substance known to man, creating an environment in which **disease, bacteria, virus, fungus**, etc., **“CANNOT”** live.

Research by Dr. Gary Young, a World renowned researcher in the field of essential oils, has shown that if the frequency of the right and left brain lobes varied more than 3 Hz, a headache would begin. If the frequency varied more than 10 Hz, a substantial or migraine-type headache would develop.

By combining an oil formula composed of Helichrysum, Chamomile, and Lavender and through simple inhalation, Dr. Young discovered the frequency of the head could be balanced and returns to normal within a few seconds.

In another experiment the frequency of a young man, 26 years old, while holding a cup of coffee, dropped in three seconds to 58 Hz. Without the use of oils, it took three days to go back up to normal. Another young man, 24 years old, drank the coffee, and in three seconds his frequency dropped to 52 Hz. When he inhaled a blend of oils, his frequency returned to normal in 21 seconds.

The above frequency information comes from Tainio Technologies.

Human cells start to mutate when their frequency drops below 62 MHz.

Low frequency also indicates a pH imbalance (such as alteration in the normal amount of sodium and potassium). Invading pathogenic frequencies are low. Positive (beneficial) bacterial frequencies are higher. Thinking negatively has been shown to lower body frequency in 3 seconds. Thinking positively has been demonstrated to take up to 21 seconds to get the body frequency back up to the optimum range. When one inhales an essential oil, along with thinking positively, there can be an instantaneous return to a higher frequency.

Pure Essential oils and oil blends that have a lower frequency have a more profound effect on making **structural/physical changes**. Oils and blends with higher frequency ranges work in the **emotional** and **spiritual regions**. **Overall, Pure Essential Oils create an environment in which disease, bacteria, virus and fungus cannot live.** This research, while in its infancy, is starting to point in a specific direction. Dr. Royal Raymond Rife taught us that a substance with a **higher frequency will neutralize a disease with a lower frequency.**

Further research has shown that with their immune-stimulating properties, essential oils **enhance** and **support** the **building of the immune system**, whether they be **inhaled** or **applied** on the body topically. Even those who contract a cold or the flu recover up to 70 percent faster using essential oils.

There is still much research to be conducted, but the premise is, if we can keep the body frequency **“high enough”** and **“well oxygenated”**, we will be free of disease...
